Education

Ambalika institue of managment and technology, CSE [AI-MI]

August 2022 – July 2026

- SGPA: 7.8

Projects

Text to image generator

github.com/AvanshChauhan/pixcribe

- Built an AI-driven web application that generates images from text descriptions using Deep Learning and Text-to-Image Diffusion Models. Developed with MERN Stack (MongoDB, Express.js, React.js, Node.js), implemented RESTful APIs, and integrated Razorpay Payment Gateway for credit-based transactions. Designed a responsive UI with Tailwind CSS, enabled secure authentication, and optimized performance for a smooth user experience.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Razorpay API, REST API, JavaScript

WizardZ

github.com/AvanshChauhan/WizardZ

- This is a responsive clone of the WizardZ digital marketing website, built as part of my front-end development practice. The design includes modern layout techniques using HTML, CSS, and responsive grids, with interactive elements like hover effects and transitions.
- Tech Stack: HTML,CSS,GSAP

AI debate

ONGOING

- Developing a conversational AI platform that enables real-time debates and discussions using Natural Language Processing (NLP) and Large Language Models (LLMs). Built with the MERN stack for scalable architecture and integrated context-aware AI responses for engaging, human-like interactions. Features include user authentication, live chat interface, topic-based debate rooms, and responsive UI with Tailwind CSS.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, WebSockets, OpenAI API / LLM, JavaScript

Technologies

Languages: C++ , JavaScript, HTML, CSS

Frontend: React.js, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB

APIs & Tools: REST API **Others:** Git, GitHub, JWT Authentication, Cloud Deployment (Render, Vercel)

Achievements:2-Star Coder on CodeChef (Rating: 1394 MAX)
